VERGÉS

CARE

At Vergés, we want as many people as possible to be able to enjoy our furniture, good design, functionality and comfort.
With this as our starting point, we must understand that we are all different, and embrace diverse abilities and capacities. This is why we want to work with an inclusive perspective, producing accessible, robust and comfortable furniture.

We care about well-being

Bahía Armchair

We contribute to creating friendly environments that allow people to live as comfortably, safely and independently as possible.

Mediterranea Armchair

Albufera Armchair

At Vergés Care, we emphasise aspects such as ergonomics, accessibility, comfort and maintenance, without ever renouncing good design and aesthetic well-being, because we believe that an accessible, well-designed and well-equipped space contributes to creating a healthy and healing environment for people.
